Full Stack Web Developer

Web Developer, code buff, University of Utah Full-Stack Coding bootcamp graduate who enjoys applying coding experiences to solve problems and learn from different kinds of projects. A Registered Nurse caring for ICU patients including COVID-19 Crisis Response altering course to become a full-time full-stacker. I enjoy working alone and in teams, outdoor activities, and awesome results from coding.

I aim to be an expert in a small set of core technologies before expanding to the wider net of trends.

Technical Skills

Languages: JavaScript, experience with React, Express, NodeJS, HTML/CSS

Visualization: Bootstrap

Database: MySQL, MongoDB, Firebase

Other: GitHub, Heroku, GitBash, RESTfulAPI, Postman, Kanban, OAuth2.0, Auth0

Major Projects

Weather Station – <https://claughter.github.io/weather-station/>
<https://github.com/CLAughter/weather-station>

CRUD Frontend Weather App

- textual information and graphical tiles for enhanced user experience of weather information per user identified location requiring user input of email address and password for login.
- Tools used: HTML5, CSS3, JavaScript, Node.JS, Firebase, openweathermap.org, googlemaps and canvas APIs

Eat Da Burger – <https://agile-badlands-97906.herokuapp.com/>
<https://github.com/CLAughter/burger>

Heroku Deployed Sandwich Ordering App

Full-stack web app that identifies and classifies food allergens

- Individual project utilizing ORM file structure and persistence data storage allowing user to select, order and delete sandwiches of choice.
- Tools used: HTML5, CSS3, JavaScript, jQuery, Node.JS, MVC File Structure, Express, Handlebars, ORM, MySQL

Gift Together - <https://stark-gorge-52811.herokuapp.com/>
<https://github.com/jwbeuchert/project3/tree/chris2>

Full-stack React-Based Gift Wish List App

- Group project requiring login authentication and authorization. User can populate and edit personal gift list and share with Friends list. Friends can select from user list to purchase item and user is unable to view this transaction. All parties can chat via communication function.
- Tools used: React, Express, MongoDB, mongoose, Node.JS, Firebase, OAuth, Auth0

Christopher L Laughter, Web Developer, BSN, RN

Employment - Place of Work

I have been a Registered Nurse at the U.S. Department of Veterans Affairs and gained additional skills working at several hospitals in the SLC valley in Utah

I continue to maintain an active RN License as an ICU frontline healthcare provider where I have enjoyed a career in helping people improve on their continuum of health.

Previous Relevant Work Experience

- Tech Support for 2 years in Microsoft Windows setup providing troubleshooting assistance for end-users with installation and compatibility issues
- Tech support for 1 year to new purchase customers of computers and devices with setup, installation and general use compatibility issues
- Liaison at Novell for 3-month internship in daily interaction with software engineers and Hughes Satellite engineers communicating field engineers experience with newly implemented satellite broadcasting of Novell software updates
- Watson Labs Pharmaceuticals 3-month internship functioning as campus-wide IT tech hardware support and software installation, daily system backup and general assistance as needed while reporting to the Director of IT

Education

Full Stack Coding Bootcamp – University of Utah/Trilogy

Bachelor of Science in Nursing - Western Governors University

Course Certifications

Udemy – Modern JavaScript From The Beginning instructor: Brad Traversy

Military Service

United States Air Force
