---

### Full Stack Web Developer

Full Stack Web Developer providing services allowing clients to become more productive in their day-to-day activities. Keen on app development and a commitment to detail and time schedules are strongly held values that have developed during my career. Enjoy applying my coding experience in individual and team projects.

---

### Technical Skills

**Languages:** MERN stack, HTML/CSS, JavaScript, PHP-Laravel

**Visualization:** Bootstrap, tailwindcss

**Database:** MySQL, MongoDB, Firebase

**Other:** GitHub, Heroku, GitBash, Microsoft Office Suite

---

### Projects

**Weather Station** – <https://claughter.github.io/weather-station/>

2019

*CRUD Frontend Weather App*

- textual information and graphical tiles for enhanced user experience of weather information per user identified location requiring user input of email address and password for login.
- Tools used: HTML5, CSS3, JavaScript, Node.JS, Firebase, openweathermap.org, googlemaps and canvas APIs

**Eat Da Burger** – <https://agile-badlands-97906.herokuapp.com/>

2019

*Heroku Deployed Sandwich Ordering App*

*Full-stack web app that identifies and classifies food allergens*

- Individual project utilizing ORM file structure and persistence data storage allowing user to select, order and delete sandwiches of choice.
- Tools used: HTML5, CSS3, JavaScript, jQuery, Node.JS, MVC File Structure, Express, Handlebars, ORM, MySQL

**Gift Together** - <https://stark-gorge-52811.herokuapp.com/>

2020

*Full-stack React-Based Gift Wish List App*

- Group project requiring login authentication and authorization. User can populate and edit personal gift list and share with Friends list. Friends can select from user list to purchase item and user is unable to view this transaction. All parties can chat via communication function.
- Tools used: React, Express, MongoDB, mongoose, Node.JS, Firebase, OAuth, Auth0

## **Christopher L Laughter, Web Developer, BSN, RN**

### **Education**
